LECTURES AND PUBLICATIONS

Dr. Howard is frequently invited to address medical audiences, and has delivered more than 125 lectures to fellow ophthalmologists, dermatologists, otolaryngologists, endocrinologists, and nurses.

He has authored 11 articles that have been published in peer-reviewed journals. Dr. Howard has contributed 12 other articles and chapters for ophthalmology reference books, training manuals and textbooks.

EXPERIENCE

“Practice makes perfect,” they say. While no surgeon can claim to be “perfect,” this old adage does serve as a reminder that a surgeon who has had more opportunity to perfect his technique is likely to be more skilled than a surgeon who has had less “practice.”

Dr. Howard maintains a very active surgical practice, consistently performing 1,000 to 1,250 oculoplastic procedures *per year* in the operating room, as well as many more in-office procedures.
